PROFILE

Driven, curious and enthusiastic computer science student, with a solid foundation in programming logic, data structures, mathematics and physics. Seeking to utilize skills in collaboration, communication, creativity and visual design as a programmer

EXPERIENCE

Center for Applied Systems and Software, OSU, 2018 - current

Junior Developer

I worked in a team of developers to create full-stack restful applications for the web, created training for other developers, and helped interview candidates. The two projects I spent the most time on were the Smarter Balanced project and Oregon State Construction Contractors Board Falcon project. During the Smarter Balance project I worked predominately on the front end of the React application during the last four months of development. My most common responsibility was ensuring our product looked like the mock, both on desktop and mobile. Currently, I work on the unfinished OSCCB Falcon project as one of the two student leads. I have been responsible for architecture decisions, database design, and implementing views, controllers, and microservices in the ASP.NET Core framework.

Voyant Technologies - 2016

Student Intern

Helped identify and fix bugs

EDUCATION

Oregon State University• 2020

BS Computer Science

Minor in Studio Art

GPA: 3.73

PERSONAL SKILLS

- Leadership
(Founding Father DTD Delta-Lambda Chapter)
- Communication
(Worked in Teams of Developers and Students)
- Creativity
(Enjoy's Animating, Art, Video Game Development, and Writing)
- Design
(Designed T-shirts, Backend Systems, and UI for professional use)

SKILLS

C#	● ● ● ● ●
ASP.NET	● ● ● ● ●
JavaScript	● ● ● ● ●
React	● ● ● ● ●
C, C++	● ● ● ● ●
SQL	● ● ● ● ●
